

Surgeon Chair

Design

Nightingale partnered with Intuitive Surgical to design the Surgeon Chair for the da Vinci Surgical System. This specialized chair complements the ergonomics of the surgeon console to provide superior comfort and support to a physician.

Features & Benefits

- High resiliency Enersorb™ foam reduces pressure points and fatigue.
- Easy to use seat, back and height controls enable quick adjustments for a range of users.
- Unique armrest design minimizes interference with the surgeon console.
- Vinyl fabric and aluminum base provide durability in a hospital environment.
- Soft wheel casters allow the chair to move effortlessly on hard floor surfaces.
- Complies with ANSI/BIFMA and California fire code #133.

da Vinci Surgery
Less Invasive • More precise • Faster recovery

This presentation is for general information only and is not intended to substitute for formal medical training or certification. An independent surgeon, who is not an Intuitive Surgical employee, provides procedure descriptions. Intuitive Surgical trains only on the use of its products, such as the da Vinci Surgical System and is not responsible for surgical credentialing or training in surgical procedures or techniques. As a result, Intuitive Surgical is not able to establish the accuracy of procedural content, while clinical studies support the use of the da Vinci Surgical System as an effective tool for minimally invasive surgery. Individual results may vary. © 2016 Intuitive Surgical. All rights reserved. Intuitive, Intuitive Surgical, da Vinci and Endoware are registered trademarks of Intuitive Surgical.
