

Interior Office Solutions Los Angeles Showroom Achieves WELL Gold Certification

Los Angeles, CA — September 18, 2018 — Interior Office Solutions, the fastest growing Haworth preferred dealership in the U.S., is pleased to announce their Los Angeles showroom has achieved WELL Certification at the Gold level from the International WELL Building Institute™. It is the first commercial furniture dealership to receive the distinction.

The WELL Building Standard™ (WELL) is the premier building standard focusing on enhancing people's health and wellness through the buildings where we live, work and play. That focus is also the keystone of what IOS provides its clients: the opportunity to improve business culture, and employee wellness, by creating workspaces where people can thrive.

“This certification reflects how IOS lives its values,” CEO Jesse Bagley said. “When we say we’re all about helping our clients improve their culture, this is exactly what we’re talking about.”

IOS helps businesses attract and retain talent through top-quality furniture, workspace design and consultation. From conception through final install, the company's expert consultants help guide business leaders toward positive workspace changes that have a meaningful impact on company health, wellness, and productivity.

The company's Los Angeles showroom is the first of its spaces to achieve WELL Certification. Their Portland showroom is WELL-registered, and on its way to becoming WELL Certified. Their Irvine showroom has achieved LEED certification.

WELL is grounded in a body of evidence-based research that explores the connection between the buildings where we spend approximately 90-percent of our time, and the health and wellness impacts on us as occupants of these buildings. To be awarded WELL Certification by IWBI, the IOS Los Angeles Showroom underwent rigorous testing and a final evaluation carried out by Green Business Certification Inc. (GBCI), which is the third-party certification body for WELL, to ensure it met all WELL Certified Gold performance requirements.
